Dynamic, profitable and sustainable farming

e-update - July 22nd 2010

Hi Mike

Welcome to the first edition of the Mallee Sustainable Farming **e-update** series.

We have developed this new e-format so as to provide more regular, easy to read information to you about relevant topics, issues and events. The regular Sustainability Snapshots newsletter will continue with this e-update being a shorter and simpler version in between. So here we go.

- **Farmtalk no 37** has been released - "**Success with Sandy Soils**" from Chris McDonough and Dr. Gupta Vadakattu. It focuses on understanding why sandy soils can become so responsive and what are the keys to turning sandy soils around. To download the full article click [here](#).....
- A **reminder** of the **GRDC Grains Research Updates** coming soon. The **Ouyen event** is **next Wednesday July 28** titled "**Managing Margins amidst Volatility**" (the SA Mallee event at Lameroo will be on 25th August). **RSVP's** by this **Friday 23rd** July please. The flyer and registration form can be downloaded from the MSF website or by clicking [here](#).....
- MSF announces its newest **Gold Level Corporate Partner - grainASSIST** - "a leading agricultural broking company that offer a range of products and services to growers across the Mallee". To find out more about grainASSIST go to www.grainassist.com.au.

MSF is always keen to receive feedback from growers so let us know what you think or what else you would like to hear about via email admin@msfp.org.au, calling us on 03 5021 9100 or visit our website at www.msfp.org.au.

Kind regards from Mike Mooney and the MSF team.
